**Gorillas Gang Club is a large-scale project that includes the DAO launcher, the NFT project and the Metaverse! The entire project will be tied to 10,000 NFT, which will be the key to decentralizing the entire project.**

NFT Gorillas Gang Club is a collection of **10,000** unique NFT Gorillas Gang – unique digital collectibles living on the **Ethereum** blockchain. Your Gorillas Gang serves as your club membership card and provides access to exclusive benefits for club members only. The first advantage is access to a **DAO** platform.

The goal of this project is to give the world a unique and one–of-a-kind digital collection, with the help of which a truly decentralized DAO platform will be implemented to launch the best projects that are truly useful to society and the blockchain industry.
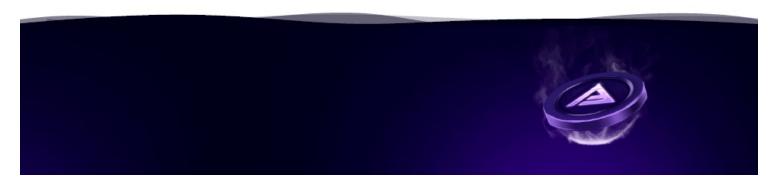

META LAB is an investment incubator of projects.

The goal of META LAB is to provide tools for writing tokenized and NFT smart contracts in automatic mode, as well as tools to help launch third–party projects, the best of which will be launched for free on the Gorillas Gang fully decentralized DAO platform, if they carry real value for the cryptocurrency community and the blockchain industry.

Everyone who has a **META** token can invest in the projects being launched, while a separate investment cabinet with a larger investment allocation will be deployed for club members (holders of unique NFT Gorillas Gang).

All rights to the platform belong exclusively to members of the Gorillas Gang club (holders of unique NFTs), which makes this platform completely decentralized. All decisions on the DAO platform are made by voting with META tokens. All income of the DAO is distributed among the members of the Gorillas Gang club (holders of unique NFTs).

All club members (holders of unique NFTs) will be constantly rewarded with tokens of the platform's own DAO projects. Also, club members will have a priority queue in the mint of new NFT projects and will be regarded as strategic partners of the DAO platform.

The amount of distributed remuneration to members of the Gorillas Gang club directly depends on the rarity of their unique NFT Gorillas Gang.
THE METALAUNCH INCLUDES TWO EXCLUSIVE MODULES – NFT MINIG BOOST & NFT ROYAL FUSION.

NFT MINING BOOST is an exclusive module for NFT Gorillas Gang holders, which makes it possible to mine META tokens by placing NFT Gorillas Gang in a staking. The hashrate of the NFT Gorillas Gang directly depends on the rarity of the NFT Garillas Gang.

NFT MINING BOOST

HASHRATE	47
PROFITABILITY	~ 09 META/24
TOTAL	283.19 META

GORILLAS GANG #

APROVE

HOW TO MINING META TOKEN?

The NFT MINING BOOST module independently calculates your NFT GORILLAS GANG, displays it, shows you the hashrate and estimated profitability.

You will only have to confirm the transaction by clicking on the APROVE button.

NFT ROYAL FUSION is an exclusive module that allows you to merge two NFT Gorillas Gang, in order to obtain a completely new hybrid NFT with a unique rarity and the highest hashrate. At the same time, it is possible to merge only with the original NFT Gorillas Gang. Hybrid NFTs cannot merge.

NFT ROYAL FUSION

GORILLAS GANG MITH #	HASHRATE	572

HOW TO MINT THE MYTHICAL GORILLAS GANG?

The NFT ROYAL FUSION module independently counts your GORILLAS GANG, after which you will need to confirm the transaction by clicking the aprove button and your NFTs will be merged. When merging your two NFT GORILLAS GANG, all their features will be transferred to the mythical NFT GORILLAS GANG, after which your NFT will be burned and in return you will receive one new mythical NFT with an increased hashrate for mining META tokens and the status of "GREAT WARRIOR".

The status of "GREAT WARRIOR" gives you maximum health and increased strength in the GORILLAS GANG CLUB metaverse.

THE NFT MINING BOOST & NFT ROYAL FUSION MODULES GIVE A STRIKING EFFECT OF THE POSITIVE DYNAMICS OF THE FLOOR PRICE OF THE NFT GORILLAS GANG, MAKING THEM SUPER-PROFITABLE.

Briefly about the P2E metaverse:

The metaverse will be created on **Unreal Engine 5** using **web 3.0** technology.

An open seamless jungle world in which players will develop, improve their characteristics through a specially designed module of the METALAUCH project - NFT ROYAL FUSION. They will build settlements, unite into clans and create alliances between clans and settlements in order to defend themselves from a larger clan or vice versa, attack a larger and stronger clan. When players win clan wars, they are rewarded with all the lands and resources that belonged to the losing clan. This is only a small part of what will be in the metaverse.

ROADMAP

PHASE 1

- LAUNCHING SOCIAL NETWORK
- WEBSITE LAUNCH
- NFT DEVELOPMENT & ERC-721 SMART CONTRACT DEVELOPMENT
- DEVELOPING OF A DAO PLATFORMS {METALAUNCH}
- COLLABORATIONS
- THE START OF MINT

PHASE 2

- DEVELOPMENT OF A TOKENIZED SMART CONTRACT
- THE ISSUE OF TOKEN **META** &LISTING ON DEX EXCHANGES
- REMUNERATION OF CLUB MEMBERS {HOLDERS OF UNIQUE NFT GORILLAS GANG)
- LAUNCHING THE DAO PLATFORMS {METALAUNCH}

ANLYSIS AND STRATEGIES

- SWOT ANALYSIS
- STRATEGY CANVAS FOR GORILLAS GANG NFTs
- GO-TO-MARKET STRATEGY
- RETENTION STRATEGY
- DEVELOPMENT AND LAUNCH GORILLAS GANG METAVERSE
- DEVELOPMENT AND LAUNCH OF OWN PROJECT

TOKENOMIC

NFT Token Supply – 10 000   DAO Token Supply – 1 000 000 000

Name – GGC   Name – META

Blockchain – Ethereum   Blockchain – Multichain

Gorillas Gag Club Metaverse – Token Supply 150 000 000; Name – GGM; Blockchain – BSC

ATTENTION: to upgrade characters to the status of "GREAT WARRIOIR" in the metaverse, META tokens are required. Such an upgrade can only be done by owners of two NFT Gorillas Gang, via DAO METALAUNCH in the NFT ROYAL FUSION module
